Chapter 9

Database Techniques	123
Requirements	124
General	124
Fields.....	124
Rules	124
Create a database	125
Create the format	125
Create the dbdict.....	126
Add data.....	127
Add an array field	128
Using format control validations	129
Make fields required.....	130
Check field values	131

Using a combo box to control values	132
Mandatory fields.....	134
Using format control calculations	135
Setting forced values	135
Setting default values.....	138
Using counters	139
Using the sysmod fields.....	145
Using format control conditions.....	148
Adding a QBE format.....	148

Chapter 10

Advanced Database Techniques	153
Links for fill and find.....	153
Set up for fill and find	153
Change the Find format	156
Change the Fill QBE format	157
Fill into an array	159
Queries.....	161
Using format control queries	162
Simple query.....	162
Create model records for compound queries.....	163
Compound query	163
Using associated arrays	164
Using global lists	168
Using virtual joins	171
One to one relationship.....	171
One to many relationship	173
Using display options.....	175
Using format control additional options	176
Using a stored query.....	178
Create a stored query	178
Adding to the display option.....	178
Using a script with database.....	179
An unbranched script.....	179
A branched script.....	181

Using validity	182
Using a simple query.....	182
Using a compound query	184
Additional enhancements	185
