

Table of Contents

Chapter 1

Introduction	1
Who The Book Is For	1
What's in this book	2
What's New in 6	2
System Language	2
Developing in ServiceCenter	2
Document Engine	2
How Process Works	2
Setting up A Work Environment.....	2
Basic Techniques	2
Data Techniques.....	3
Usability Techniques.....	3
System Techniques	3
Debugging ServiceCenter.....	3
Using Clocks.....	3
Code Editor.....	3
Training Module	3
Assignment Engine.....	4
Sample Requirement.....	4
Screen Design Standards.....	4
Quick Reference	4
RAD Functions.....	4
Conventions Used in The Book.....	4
How to Contact Us.....	5

Chapter 2

What's New in 6.....	7
Important Changes	7
Recommendations.....	8
Upgrade or Reimplement?	9
Upgrade	9
Pros	9
Cons	9
Reimplement.....	9
Pros	9
Cons	10

Chapter 3

System Language	11
Variables	11
Creating variables	12
Nulls	13
Key points about variables	13
Naming conventions.....	13
Variable pools	13
Global.....	14
Thread	14
Local	14
Reserved words	14
Basic data types.....	14
Character	14
Number	15
Date/time.....	16
Logical	17
Compound.....	17
Array	17
Advanced: Structure	19
File or record data type	20
Expressions	21
Arithmetic expressions	22
Addition (+)	22
Subtraction (-).....	22
Multiplication (*).....	22
Division (/).....	22
Exponentiation (^).....	22
Modulus (%)	22
String and array expressions	22
Logical expressions.....	23
Relational operators	23
Logical operators	24
Statements	24
Assignment	24
FOR loop.....	24
IF statement	25
WHILE statement	25
Syntax	26
RAD Functions	26
Queries	26
The true query.....	26
False query	27

NULL query.....27
 query on a Field27
 Compound queries27
 Wildcards27
Javascript.....28
 the ScriptLibrary.....28
 Creating code28
 Syntax29
 Creating functions.....29
 Calling functions from RAD30
 Calling functions with a RAD statement.....31
 Global System Objects31
 variables31
 Document Engine actions32
 File Functions32
 Using RAD functions.....34
 Using in a condition34
 Using JavaScript in format control35
 Trigger scripts35
 JavaScript Resources.....36

Chapter 4

Developing in ServiceCenter37
ServiceCenter objects38
Naming standards38
 Naming objects38
 dbdicts rules:.....38
 Format, link, and format control rules:.....39
 Menu rules:39
 Other object rules:.....39
Development environment.....40
 Production.....40
 Test.....40
 Development.....40
Code control.....40
 Tagging objects41
 Formats:41
 Format Control, Link:41
 Validity:41
 Stored Query:42
 Objects:42
 Macros, Display:.....42
 Other objects and data:42
 Unload script.....42

Revisions.....	43
Testing	43
System testing.....	43
Application testing	43
Moving into production	44
design standards	44
Development tips	44
controlling change	45
Managing requirements.....	45
Process flow	46
Responsibilities	47
ServiceCenter Manager:	47
ServiceCenter Support Team:	47
ServiceCenter User:	48
ServiceCenter User's Group:.....	48
Requirement Sponsor:.....	48
Process details.....	48
Submitting a Requirement:	48
Reviewing User Requests:	48
The User's Group Meeting:.....	48
The SST Developer.....	49
SOFTWARE CHANGE request	49
User requirements.....	49

Chapter 5

Document Engine	51
Background	51
Basics.....	51
Creating the Display	52
Displaying a Search State	53
Displaying the Open State	53
Displaying a List.....	54
Displaying a Single Record	55
Database operations	56
security	58
Category.....	58
Phase.....	59
Page history.....	59
Alerts	59
files used by alerts	59
Object.....	59
Alert	60
AlertDef	60

notification.....	60
Alertlog.....	60
category.....	60
phase.....	60
Setting the alert.....	61
Processing the alert.....	61
Activities.....	61
SC Manage.....	61
Notifications.....	61
Approvals.....	62
files.....	62
ApprovalDef.....	62
Approval.....	62
ApprovalLog.....	62
approval process.....	62
Setup.....	62
Group action.....	63
locking.....	63
Document Engine Techniques.....	63
Setting up page history.....	63
Adding alerts.....	65
Chapter 6	
How Process Works.....	69
Executing a Process.....	69
Adding a Displayoption to call a Process.....	69
Calling a Process From a Displayoption.....	72
Calling a Process from Format Control.....	73
Controlling the Flow.....	74
When to Use Process.....	75
Eliminating Duplicates.....	76
Chapter 7	
Setting Up a Work Environment.....	79
Sample development menu.....	79
Chapter 8	
Basic Techniques.....	83
Mandatory Fields.....	83
Enforcing an entry of Any Value.....	84
Example 1: Using format control.....	84
Example 2: Using Data Policy.....	85

Enforcing valid values with a combo box	86
Enforcing with a FILL	87
Example 1: Using Queries in format control	88
Example 2: Using RTECALLS in format control	88
Example 3: Using data policy	90
Enforcing an entry within a range.....	91
Example 1: Using validations in format control.....	91
Example 2: Using calculations and validations in format control.....	92
Conditional enforcement	94
Formatting for display	94
Formatting a telephone number	94
Formatting a Payroll number.....	96
Formatting money	98
Formatting dates	99
Displaying time only	101
Disallowing special characters in a field.....	102
Creating a dropdown list	103
Example 1: Use format control.....	103
Example 2: Use globallists	104
Calculating a value	106
Displaying with different formats	107
Removing seconds from a time.....	109
Separating first and last names.....	110
Capitalize first letter of a string.....	112
Remove unwanted characters	113
Security	114
Restricting access to a file	114
Restricting access to certain records	115
Hiding data	116
Example 1: Use DVD and format control	116
Example 2: Use data policy	118

Chapter 9

Data Techniques	119
Working with arrays.....	119
Eliminating duplicates from an array	119
Sorting an array.....	121
Making a single string from an array	122
Making an array from a single string	123
Eliminating Duplicates.....	125
build difference lists.....	126
Queries	129
Controlling fields to query on.....	129

Scripting a query	130
Searching any place in a field	132
Searching any place in a record	134
Find string application	135
Auditing	136
Keeping a list of who and when	136
Maintaining an audit log	139
Keeping a copy of selected data	142
Maintaining a complete audit	145
Time	148
End of the day	148
Assignment clocks	151
Calculate with calendar	153
Manipulating data	154
Updating associated records	154
Posting updates to inventory	155
Data policy	157

Chapter 10

Usability Techniques	161
Working with links	161
Multiple fields to build the fill query	162
Virtual joins	165
Showing open tickets	166
Virtual join list with add/update capability	169
Add query to virtual join	173
Showing a count of software	174
Filling into an array with a query	175
Fill into a structure	178
Fill from different files	179
VIP message	181
Making operator easier to maintain	182
Capability word array (in chapter 9)	182
Showing the password status	185
Preventing change of login name	186
Controlling the SysAdmin capability word	187
Login	188
Login pop-up survey	188
User interface	192
Temporary check boxes	192
Colored lines in a qbe	192

User-defined inbox	194
Product type	197
Use a Table for Mandatory fields	200
Univeral Code Table	203
Making drop-down values dependent	205
Password reset	207

Chapter 11

System Techniques	213
System	213
Custom bitmaps	213
Mandanten	215
Copying a file	216
Causing an Abend.....	218
Custom Excel Feed.....	218
Create a New Macro Type	226
Notifications	227
On Screen Messages.....	227
Email an individual	230
Page.....	233
Send a future email	234
Send a future page.....	235
Use Email for Paging	237
Calling windows applications	240
From a menu:.....	240
From format control.....	240
From displayoption.....	241
Miscelaneous.....	242
Find RAD Parameter Values.....	242
Fill in Catalog info.....	243
Show Names in a List	247
Triggers	249
How triggers work	249
Adding a trigger.....	249
Trigger.apm.expire	250
Trigger.counter.....	250
Trigger.invoke.auditor	250
Trigger.event.record.....	250
Trigger.stamp.record.....	250
Schedules	251
Schedule set up	251

Us.count.connections 251
 Us.calc.delta 252

Chapter 12

Debugging ServiceCenter 255
General Troubleshooting 255
 Understand the problem 255
 Analyze the problem 255
 Isolate the problem 256
 Identify the cause..... 256
 Fix the problem 256
 Test..... 256
Using the debugger 256
 Starting the debugger 256
 Finding the screen id 258
 Viewing displayscreen record 258
Format control 259
 Conditions 259
 Syntax problems 259
 Logic problems 259
 Queries 260
 Calculations 261
 Validations 261
 Subroutines..... 261
 Common problems 263
Links 263
 Fills/finds 263
 Button is grayed out..... 263
 No results of a fill 264
 The fill cannot be performed 264
 Nothing fills in after selecting from the list..... 264
 The wrong field fills in after selecting from the list..... 264
 Viewing the query..... 264
 Virtual joins 265
 No link record..... 265
 Using a format name instead of a file name 265
 Incorrect or missing format 265
 No data displayed 265
 Wrong field name in the link 265
Macros 265
 Check the condition 266
 Statements with \$L.new only 266
 Statements with \$L.old 266
Scheduler issues 268

Scheduler Process	268
Running a schedule record	269
Problems with Process.....	270
Displayoptions	270
Stack overflow.....	271
Viewing a format genout	271
Login problems	273
Logging in.....	273
Login Techniques.....	274
Common (and uncommon) problems	274
Data problems.....	274
Query not returning record	275
Display problems.....	275
Entering statements	276
Other	277

Chapter 13

Using Clocks.....	279
ServiceCenter Clocks	279
Clocks using applications.....	281
Clocks Using Code.....	282
Starting a clock	282
Stopping a clock.....	283
Using pmstatus	285
Using pmstatus with any file.....	285
Example	285

Chapter 14

Code Editor	291
How it Works	291
Example	292
How the Compiler Works.....	300
Possible Enhancements	302

Chapter 15

Training Module.....	305
How it Works	305
Courses	306
User records	308
Process Flow for Lesson and Quizzes.....	310
Lessons.....	310

Selecting and showing a course	316
Script to present the lessons	317
Quizzes	327
Dbdict for quizzes	327
Selecting and showing a quiz	331
Define the scripts	331
menu	339
Creating the menu	339
Using the Training module	342
Creating a course	342
Creating a Quiz	342
Unload.....	343
 Chapter 16	
Assignment Engine	345
How it Works	346
Creating the Assignment Engine	346
Customizing the Engine.....	354
Use lookup only	354
Change the fields in the table	355
To remove a field:.....	355
To add a field:.....	355
 Chapter 17	
Sample Requirement	357
Objective.....	357
Classes of modifications	357
Format and validation changes.....	359
New formats.....	359
Modified formats	359
Functional changes	359
New functions	359
Modify existing functions.....	360
Notifications	360
Data changes	360
Changes to data	361
New data.....	361
 Chapter 18	
Screen Design Standards	363
Background.....	363

Design standard	363
General	363
Font	364
Labels.....	364
Input fields.....	364
Array Field.....	365
Multi-line text boxes	365
Frames	365
Tables	366
Notebooks	366
Radio buttons	367
QBE lists	367
Tables	368
Caution	368
 Chapter 19	
Quick Reference	369
HewLett Packard	369
Start up.....	370
Your systems.....	370
User options file	371
Application variables	371
Display variables	372
Object vaRlables	373
RTE calls	374
Input/Output apps for forms designer	375
Useful queries	376
Apps for format control, menu, scripts.....	376
Data types	381
Date format codes.....	382
Reserved words	382
Link variables	383
Forms conditions	384
Command line commands	385
Global variables	386
Scdbutil	389
Unix commands	393
RAD Functions	391
